

# SOCK-LINERS PAD PRINTING SOLUTION

The future is direct printing: rather than heat transfer labels or screen printing, manufacturers are increasingly choosing to print brand names, size, and care instructions directly onto the inside of shoes. Pad printing is the ideal method for this application as it is resource-efficient and minimizes waste.

## COATES TP333 - HIGHLY OPAQUE FLEXIBLE CERTIFIED PAD PRINTING INK

Made in Germany, Solvent-based 2-component ink, highly flexible for improved wearing comfort. Very high resistance to rubbing. Ideal for trail & running activities. Easy processing for process safety and efficiency.
